Bridge of sighs

Every Sunday, MaltaToday brings you pictures of forgotten and shameful Malta

THE bridge that takes you from Marsa to Santa Venera is what we will be featuring in this first edition of Shameful Malta. This bridge is in dire need of repair.

The bottoms of the bases supporting the bridge are worn out, with the concrete bars showing. Further corrosion might lead to the bridge collapsing altogether. Moreover, the

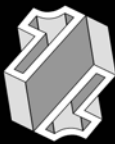

whole bridge itself and the surrounding areas are dirty and are definitely in need of a paint job.

Have you seen a place that makes you to cry out with anger because it is so neglected? Then send an e-mail to czahra@mediatoday.com.mt with the details of the place and its state.

Keep it simple
